## Hummel GmbH u. Co. KG

With 120 employees, we produce documents for transportation of persons and goods as well as labels, forms and special printed products on a surface of almost 10,000 square meters. We print up to 8 colors on the latest machines, equipped with roll-fed offset, flexographic, digital, letterpress and screen print possibilities. In the further treatment your products will receive the finishing touches: assembling, dispensing, gluing, stamping, punching, perforating, grooving, cutting – no problem at all! Our possibilities reach from standard product to individual solutions.

### Preprints

#### A4 single sheets and forms for bank transfers:

In quality suitable for laser printers, with high processing properties, printed or unprinted. We use laser-suitable special-purpose inks and UV drying. We guarantee exact DIN formats and burr-free paper borders, perforations and holes. Bleeding layouts, screened areas and gradation screens are possible.

#### Continuous forms, single or multiple, as well as carrier forms:

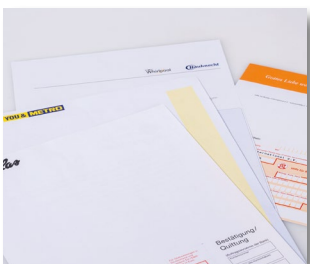

We offer different paper weights and first-class paper qualities which respond to the varied requirements of the users. High running properties on all printers. Multiple forms with crimplock or crimplock with multiflex guarantee a trouble-free use especially on matrix printers.

#### Account statements for thermal and matrix printers:

For thermal account statement printers we recommend papers in top-coated qualities, according to the recommendations of the printer manufacturers. Durability, also under different chemical and climatic influences as well as a clean, clearly legible, graphic-enabled printout are further outstanding characteristics of top-coated papers. When the paper is properly stored as per the instructions of the paper manufacturer, we guarantee an archivability of up to 12 years. For matrix printers we recommend our wood-free 80 g/m<sup>2</sup> quality paper.

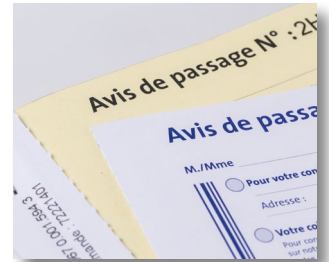

#### Backlined preprints:

Are e.g. used as return labels and address forms.

### Encoded / numbered pads

Practical, handy and versatile. Stapled, on request also available with duplex labels and adhesive strips.

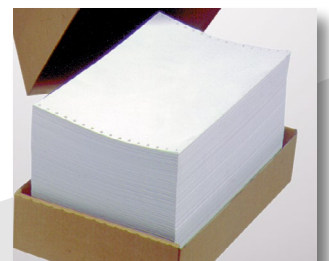

### Voting pads for polls at Shareholder Meetings

Our voting pads are used since more than 30 years for the exact determination of voting results at Shareholder Meetings. Each card can be registered quickly via automated document readers, and is unique and traceable due to its encoding. The voting pad still proves itself as a very secure voting medium. Our voting pads are used for polls at the Shareholder Meetings of almost all DAX 30 companies and other medium and small Shareholder Meetings.

### Laser, inkjet, offset and copy papers

We deliver different qualities and degrees of whiteness as well as different paper weights for all applications like e.g. usage on laser printers, high performance and desk copiers, inkjet printers, fax machines and offset printing machines. Our copy papers have excellent opacity values and are suitable for laser and copy on both sides. Available in reams of 500 sheet / 2,500 sheet per carton, and loose in climate cartons of 2,500 sheets.

## Encoded products

Parcel labels, waybills, encoded labels, single-sheet applications: with all common barcodes and 2D codes. For all necessary information like sender, consignee etc. as well as for consignment tracking.

We offer different versions: for matrix printers with tractor feed, single or multiple self-copy forms, fan-folded, on rolls or single-cut. Our waybills with plastic foil help to save plastic pouches for delivery notes. Glue-free zones, encoded duplex labels, adhesive strips (e.g. for notification cards) and copy via carbonized areas are other possibilities we can offer.

## Labels / Thermal labels

### Thermal or thermal transfer labels:

We supply labels for thermal or thermal transfer printers on rolls or fan-folded. Due to optimized materials, these comply with the highest requirements. We are flexible regarding format, outer and core diameter.

### A4 sheet labels:

Single sheet labels printed in one or more colors according to the specific requirements of the users as well as standard blank labels to be used on all copiers, laser and inkjet printers. Colored or white from our stock range in formats from 10 mm to 210 mm width per label, in packing units of 100 sheets / carton or 500 sheets / carton.

### Labels with file hole margin:

Labels with 1 to 8 webs and 20 mm to 210 mm width are available in fan-fold stacks, individually printed or blank.

## Laser printer paper (continuous)

Available in cartons, big stacks or rolls up to a diameter of 120 cm. Can be delivered in different wood-free or recycled paper qualities.

## Standard listing paper

We supply our standard listing papers in the following qualities: **wood-free / medium-fine / recycled**. We run a comprehensive range of stock items in the above-mentioned paper qualities. Special productions will be made on demand.

## ATB travel documents

For national and international airlines, airports, ferry companies, railways and travel agencies we supply:

- Boarding Passes / Boarding Pass rolls
- Baggage Tags
- P2P Tags (Point-to-Point), Cabin / Transfer / Destination Tags
- Keyhole / Cabin / Name Tags
- Flag-type Tags / Priority Tags
- Interline / Limited Release / Crew / Rush Tags
- Different documents for passenger check-in
- Air waybills
- Different cargo documents
- Tickets
- ISO Tickets, credit card size

We guarantee with our products the highest security criteria prescribed by IATA and agreed with our customers, applicable to the above-mentioned ATB documents (Automated Ticketing and Boarding), and thereby e.g. the secure arrival of the luggage at its point of destination.

## Special solutions for your company

Our customers, their products and we are in constant development: we are used to complying with your requirements. Our specialists will be pleased to support you with the development and implementation of new products.

Do not hesitate to contact us for any question.

## Our service package

Our customers receive exclusive extra services:

- Comprehensive consulting
- Logistical services
- Individually tailored B2B order platform

Our industrial engineers specialized in print and media will take over the analysis of your requirements. In doing so, they will verify your print data, formats, papers etc. to achieve a consolidation of the products, as a consequence economies of scale and finally optimization of costs.

## Consulting

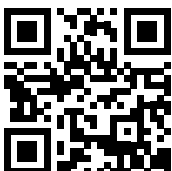

With our know-how we support our customers beyond the pure production process, so they can concentrate on their core business. We examine the entire process around the use of the printed product, along your value creation chain. We analyze the single product as well as the complete requirement with regards to print data, formats, materials and finishing. Taking into consideration the environment of the application, we optimize the technical parameters of the printed products. In a next step the different products are verified with regards to overlaps, in order to reduce costs and work by consolidation of the product range.

## Logistics

hummel print are happy to offer delivery to your cost units tailored to your requirements. Our warehouse of 3,000 pallet spaces already holds thousands of different printed products today. We are also responsible for the stock management of these products, and plan the stock replenishment in time. Orders are picked, packed and shipped out within 24 hours to our international airlines and courier, express and parcel services. Our customers can choose between just in time, express or standard delivery. To complement and further extend our logistical services, we cooperate with renowned warehousing companies that operate on a European basis.

## B2B

The efficient management of the orders of their branches or depots is very important to our customers. As a solution, hummel print offer a customized B2B order platform which allows an easy organization of branches or depots. It is e.g. possible to define the choice of products available to each branch. On request the platform can be connected e.g. to the SAP system or the internal order system of the customer. Additional features are possible, e.g. the approval of an order by another user, or the personalization of printed products and layout confirmation via preview for business cards, personalized parcel notes and labels etc.
