

Transport and logistics

Hummel GmbH u. Co. KG

With 120 employees, we produce documents for transportation of persons and goods as well as labels, forms and special printed products on a surface of almost 10,000 square meters. We print up to 8 colors on the latest machines, equipped with roll-fed offset, flexographic, digital, letterpress and screen print possibilities. In the further treatment your products will receive the finishing touches: assembling, dispensing, gluing, stamping, punching, perforating, grooving, cutting – no problem at all! Our possibilities reach from standard product to individual solutions.

Pallet labels

We supply pallet labels for the handling of your empty pallets. These are available in different versions (with/without copy, continuous numbering), individually adapted to your requirements.

Waybills

Our waybills are available according to standardized guidelines (e.g. CMR, AWB) or adapted to your individual requirements. They are available in continuous, single or block version, the number of copies can be adjusted to your needs. We can print a continuous number and/or barcode to identify the consignment free of doubt at all interfaces of your logistical chain. Individual solutions are possible, e.g. the finishing as a pocket, a self-adhesive form or the integration of a foil for protection.

Barcode labels

For faster handling we offer pre-encoded labels to identify packages and shipping units with the information you need. We can produce all common barcode types including 2D barcodes. Integrated stickers that are also printed with a barcode allow the marking of different packages of the same sending.

Miscellaneous forms

We can provide all the forms you need for your order processing, from shipping orders to dossier folders and bank transfer forms. Please ask us for special solutions as e.g. preprints with integrated labels.

Labels

Our labels are available on rolls, in sheets or leporello piles, in adhesive or carton material, for use in direct thermal, thermal transfer or laser printers. We will be pleased to add individual preprints of logos or color markings to indicate weekdays or sorting hubs. The adhesive strength will be adjusted to the corresponding situation during application and warehousing, it is e.g. possible to have special glues for logistics of frozen goods, or for tire labeling.

Notification card

Due to variable barcodes, our notification cards can easily be assigned to the corresponding consignment, and provide the recipient with all necessary information. They are available in different formats and versions; it is e.g. possible to add detachable barcode labels and an adhesive stripe.

Identification of hazardous / special goods

Preprinted labels allow you to identify every possible situation that needs to be highlighted. Labels in luminous colors ensure the immediate visibility of warnings and instructions. Special materials are available for particular applications, e.g. when handling dangerous goods, labels sticking to difficult surfaces or labels that are especially resistant to chemical influences. Contact us for special requirements like the labeling of tires, wood pallets or barrels.

Container labeling / sealing

We offer prepunched tags to identify loading units, containers or bags to transport smaller consignments. On request, these come reinforced with a metallic eyelet, with an integrated elastic band and with a copy if required. As an option, container tags are available in a tearproof material and pre-encoded. Seals with a special security cut provide efficient protection against possible manipulation of containers or bags.

Individual solutions made by hummel print

Due to our different areas of involvement, we offer you a broad range of products and services:

- encoded / personalized products (parcel notes, waybills, labels, business cards, notification cards, pads, mailings...)
- voting pads for polls at (shareholder) meetings

- consumables (copy paper, thermal transfer ribbons)
- e-shop, B2B solutions, number range administration, personalisation

Special solutions for your company

Our customers, their products and we are in constant development: we are used to complying with your requirements. Our specialists will be pleased to support you with the development and implementation of new products. Please also refer to our product and service range on the right hand side. Do not hesitate to contact us for any question.

Our service package

Our customers receive exclusive extra services:

- Comprehensive consulting
- Logistical services
- Individually tailored B2B order platform

Our industrial engineers specialized in print and media will take over the analysis of your requirements. In doing so, they will verify your print data, formats, papers etc. to achieve a consolidation of the products, as a consequence economies of scale and finally optimization of costs.

Consulting

With our know-how we support our customers beyond the pure production process, so they can concentrate on their core business. We examine the entire process around the use of the printed product, along your value creation chain. We analyze the single product as well as the complete requirement with regards to print data, formats, materials and finishing. Taking into consideration the environment of the application, we optimize the technical parameters of the printed products. In a next step the different products are verified with regards to overlaps, in order to reduce costs and work by consolidation of the product range.

Logistics

hummel print are happy to offer delivery to your cost units tailored to your requirements. Our warehouse of 3,000 pallet spaces already holds thousands of different printed products today. We are also responsible for the stock management of these products, and plan the stock replenishment in time. Orders are picked, packed and shipped out within 24 hours to our international airlines and courier, express and parcel services. Our customers can choose between just in time, express or standard delivery. To complement and further extend our logistical services, we cooperate with renowned warehousing companies that operate on a European basis.

B2B

The efficient management of the orders of their branches or depots is very important to our customers. As a solution, hummel print offer a customized B2B order platform which allows an easy organization of branches or depots. It is e.g. possible to define the choice of products available to each branch. On request the platform can be connected e.g. to the SAP system or the internal order system of the customer. Additional features are possible, e.g. the approval of an order by another user, or the personalization of printed products and layout confirmation via preview for business cards, personalized parcel notes and labels etc.
